- Keeps beer and soda cold for hours
- Ideal at parties, outdoor events & for cold beer storage
- No more ice, no more mess
- Excellent rental item
- Uses our own patented Ice Packs
- Corporate identification available
- Custom Sizes available with minimum quantities

General

The "Ice Block" Portable Refrigerator is designed for all sizes of beer and soda kegs. The "Ice Block" is ideal for bars, restaurants, caterers, breweries, beer distributors and event planners. The "Ice Block" is also a powerful advertiser and can be ordered in your specific colours and logo ID design. Cold draught beer and soda can be served perfectly at outdoor events, trade shows, weddings etc. without the inconvenience of ice and containers. Don't forget to look at our other "Ice Block" products, which include a unique cooler bag for keeping wine and pop bottles cold for indoor and outdoor use.

What is the difference between the "Ice Block" and a standard keg wrapping?

That's just it, a keg wrapping is just material wrapped around a keg. You might as well just buy your own insulation, wrap it around a keg and then duct tape it. The "Ice Block" is made from the highest grade PVC backed nylon with thick insulation and then lined with Mylar. Only this combination will withstand constant freezing and thawing cycles. Inside are mesh pockets, which hold individual ice packs. The number of ice packs depends on the size of the "Ice Block". The innermost layer of tough nylon mesh provides further insulation and takes condensation away from the container walls. The zip off lid allows the "Ice Block" to be neatly folded and stored while the ice packs are in the freezer.

How does the "Ice Block" work?

Inside are mesh pockets, which hold individual ice packs. You simply take the individual ice packs and freeze them the night before. Then the day of the event, you take them out of the freezer and place them inside the mesh pockets, which are lined inside the "Ice Block".

Company Identification

The large surface area on the "Ice Block" offers an excellent opportunity for permanent advertising. The "Ice Block" outer material can be ordered in any corporate colour specification. Professional screen printing of your logo or brand ID is available in up to 4 colours. Camera-ready artwork must be supplied with order. Minimum quantities required.

Product Performance

Starting from 50 deg. F, the keg in the Ice Block jacket cools down continuously for 8 hours to 42 deg. F. After 24 hours the keg has still maintained it's 50 deg. F. starting temperature. Without the "Ice Block", the beer keg warms up to the 75 deg. F. room temperature in only 12 hours.

Order and Lead Time

Generally, we have "Ice Blocks" in stock, but it never hurts to call ahead of time. For screen-printing and custom sizes, we require three to four weeks for delivery.

"Ice Block" Keg Sizes

1/2 Barrel - 58.6 liter Ice Block

This includes 8 Ice Block Icepacks and 1 Red (standard) insulation wrap

1/4 Barrel - 30 liter Ice Block

This includes 4 Ice Block Icepacks and 1 Red (standard) insulation wrap

1/6 Barrel - 20 liter Ice Block

This includes 6 Ice Block Icepacks and 1 Red (standard) insulation wrap

The 20-liter "Ice Block" is also good for a 5-gallon soda container

The 8 Ice Packs used with the 1/2-Barrel Ice Block jacket take up approximately, 8W"x 12L" x 10"H (all together) of freezer space. Each Ice pack is 8W"x 12L" x 1.3"H
